

Welcome! Enjoy your vacation, we will take care of everything else...

GOD TO KNOW

Keep distance

Please observe the generally applicable distance regulations of 2.0 metres, then you do not need a mouth-and-nose protector! Exceptions are of course people of the same holiday flat. Nature presents itself from its most beautiful side! Enjoy the freedom between alpine roses and healthy mountain air.

Wearing a mask

If the 2-metre distance cannot be maintained, we ask you to use the masks (*), e.g. in shops, means of transport (cable cars, bus, ...) museums and libraries.

(*): washable face masks, surgical masks, hose cloths, self made masks covering mouth and nose.

Alpenchalet-recommendations

We provide you with extensive equipment for disinfection: Entrance area, garage, shop, roof terrace! Please use them as well.

When meeting other guests in the house, we ask you to use the masks.

The roof terrace and e-bikes can only be used on reservation, so that you are guaranteed to be alone and find disinfected objects, see reservation: <https://welcome.gastfreund.net/164682>

In each apartment there is an anti-covid set with disposable gloves, chriurgical mouth-nose masks, disposable kitchen roll and hand disinfectant.

Unfortunately the books, games and hiking maps of our house library are currently not accessible. Also our guest folder can currently only be made available digitally, see: <https://portal.gastfreund.net/ferienwohnungen-alpenchalet>

In the Alpenchalet shop we ask you to use the disposable gloves provided.

To reduce contact to the essentials, we offer our guests a pre-check-in service. After a "contactless" briefing on site, we are available to you via mobile phone at any time:

+39 348 3621125 Alexandra
+39 347 2437203 Hannes

Restaurants

In restaurants, it is possible to do without the wearing of a guard at the TABLE, and before and after using the toilet, hands should be disinfected using suitable equipment. Many restaurants also deliver to Alpenchalet.

Our cleaning protocol

- E-bike (handles, gears, seat), helmets and locks
- Roof terrace (sauna, bar, deck chairs) and whirlpool are professionally disinfected BEFORE each use.

Daily disinfection of door handles throughout the house.

On request, we even offer to wash your private clothes (with virus-killing special detergent) and disinfect your home in between.

The final cleaning is carried out according to WHO guidelines, the laundry is washed at 90° for 90 minutes and steam-ironed, and a final disinfection with an OZON generator is carried out (scientifically proven virus killing).

Due to the complex room disinfection, we can release the holiday flat for you from 16:00 o'clock.
